

LAUNDRY SAN

LAUNDRY SANITIZER

FEATURES

- QUAT BASED SANITIZER
- REDUCES BACTERIAL COUNTS BY 99.9%
- SAFE FOR COLORED TEXTILES
- DEODORIZER

PRODUCT DESCRIPTION

LAUNDRY SAN is a laundry sanitizer for use in commercial, institutional and industrial laundry operations. This product sanitizes fabrics, reducing bacteria counts by 99.9%. Especially useful for colored textiles that cannot be bleached. Kills HIV-1 on laundry in commercial, industrial and institutional applications when presoaked for 10 minutes before normal washing. **EPA Registered.**

Phosphate Free.

AREAS OF USE

For use on washable fabrics such as, diapers, napkins, athletic apparel, hospital and institutional linen.

USE DIRECTIONS

Dispense **LAUNDRY SAN** directly from its shipping container using an automatic liquid dispensing system. The authorized representative servicing your facility will establish a program suitable for your individual requirements. At 12 ounces per 100 lbs. of dry laundry, **LAUNDRY SAN** provides sanitization against *Staphylococcus aureus*, *Klebsiella pneumoniae*, *Pseudomonas aeruginosa*, and Methicillin resistant *Staphylococcus aureus* (MRSA). For sanitizing step, fill washer to low water level with minimum temperature water of 95° F. Using an appropriate dispenser, inject **LAUNDRY SAN** into the sanitizing rinse step at the rate of 1 oz./gal water to yield 780 ppm active quat. Treat the laundry for a minimum of 5 minutes at a minimum temperature of 95° F. Other laundry additives such as fabric softeners, laundry sours, starch and sizing can be used per manufacturer's instructions in subsequent rinse cycles after the sanitizing rinse cycle.

PACKAGING

PYL3549 4x1 Gallon Case
